# Web Booking Engine

This can be simply added to your existing website enabling guests to book rooms directly from your hotel's website. The web booking engine is mobile-optimized - and allows visitors to book rooms from their smartphones or tablet. Get more commission-free direct bookings and improve top-line revenue per booking from hotel booking software.

It's easy to manage every kind of direct booking using a property management system with a hotel booking system. Allow travel agents, corporates, and customers to access the personalized booking console to review and book at negotiated rates. The software support team makes this move a smooth process with the online hotel booking software.

# Housekeeping Solution

---

Our housekeeping software module has been built to offer flexibility and improve productivity in your housekeeping department. Our range of dynamic features ensures that everything is cleaned, maintained, and organized to your standards.

The housekeeping module comes with an array of automated functions designed to assist your housekeeping department with efficient management of this critical function.

Tasks can be allocated to your housekeeping team via the roster screen, and you can even pinpoint the exact location of every housekeeper who is using the staff portal by viewing their active task.

What can you get with the housekeeping module?

Track in real-time

The staff portal will enable real-time reporting and instant updates. Using their mobile devices, your housekeepers will be able to:

- View their daily tasks
- Set a timer to track how long each task takes
- Mark tasks as complete which will instantly update the room clean status
- Record DND or refusal of service

# Membership module

Cloud-based engagement management platform organizations. The software integrates event management, membership management, customer relationship management (CRM), email marketing, payment processing and dedicated mobile apps into one platform.

The software allows membership renewal workflow; users are alerted to outstanding payments and can send automatic reminders to members via email and through push notifications. The mobile membership directory lets organizers view member information and connect with members. Users can search through the member directory and create search filters to identify specific types of members.

# Banquet management

Banquet hall and wedding venue software that streamlines your event bookings.

Automate processes, boost revenues and save 62+ hours/month with our all-in-one banquet and wedding venue management software.

Manage all your event details, sales and billings and enhance the client experience with 20+ online booking, event planning and CRM tools.

Lots can fall through the cracks when you're bouncing between spreadsheets, emails and multiple apps. Our wedding and banquet hall management system provides two dozen integrated tools, including intuitive venue booking and scheduling functionality, so you are on top of every event space reservation.

# Accounting module

The most flexible and easy payroll management software. Packed with the most robust features like income tax calculator, flexi reimbursements and Expat grossing up tax, it surely is your perfect tool for fast payroll calculation.

# Payroll management

The most flexible and easy payroll management software. Packed with the most robust features like income tax calculator, flexi reimbursements and Expat grossing up tax, it surely is your perfect tool for fast payroll calculation.

# Inventory module

Installing and using inventory management software decreases the time spent tracking inventory you purchase and the items you sell. But inventory management software provides numerous benefits for small business owners, including:

**Reduced errors:** Manual data entry is prone to errors. Inventory software allows you to scan barcodes and update many sales channels automatically.

**Increased efficiency:** Automation tools handle repetitive tasks in the background, so entrepreneurs can focus on more pressing matters.

**Optimized inventory:** Maintaining the right balance of stock is crucial to your budget and customer experiences. The software gives you visibility into this process.

# Reservation management

The solution helps you to securely collect and stores your property's bookings. Property operators use the software to access past, present and future reservations, which they can then manage accordingly. By implementing a robust hotel reservation system, hoteliers become more efficient by automating a huge portion of their daily operations and conveniently streamlining the guest's online booking journey.

Streamline operations with hotel reservation software  
Hotel reservation software isn't just built for hotels; flexible solutions can be adapted to suit operators of all accommodation types, from motels, resorts and serviced apartments to holiday parks and guest houses. They are also ideal for multi-property operators, especially if the solution is cloud-based.

# Room management

---

End-to-end facilities management product that combines a help desk, space planning, preventive maintenance, asset management and more into a single solution.

Allows users to scale their businesses but without a large-scale additional investment. All features are included in the main license, so users can use all or just a portion of the software at will and scale as needed without any additional costs.

Utilizes the familiar look and feel of Microsoft Outlook to encourage a lower learning curve. There's also an import facility to port over existing data into a single, centralized database that's the core of the software.

# Revenue management

---

ECompanies use revenue management software to match their sales with customer payments and reduce revenue leakage. Accountants leverage these tools to recognize and allocate revenue to multiple business entities. Managers from departments such as sales, marketing, and operations use revenue management software to monitor the performance of products and services sold by the company and to optimize their offerings.

Through the use of these tools, revenue data can be evaluated to identify which customers or contracts are the most profitable for the company.

# CRM and customer data management

---
